### Product Summary

91 4T Wafer tweezer

### Product Description

Material 302 - L 125 mm - HRC 35.

Our Vetus tweezers are especially designed for the handling of delicate and fragile silicon wafers, Made from antimagnetic and anti acid SA Stainless steel with a very smooth surface and serrated handles for easy grip and a non-glare finish. These tweezers are specially designed to handle different fragile and delicate materials of gallium, silicon wafers, scintillation discs, glass slides, coverslips etc. . These Vetus tweezers have a smooth polished non-glare surface with a satin finish. The tweezers have stopping pins turned up on lateral edges and graduated lower paddles prevent the wafer from slipping.
