CONTEMPORARY TOOLS FOR THE INDUSTRY THAT MANUFACTURES QUALITY

Equipments and Tools for the Industry

Etneo is an Italian company founded in Milan in 1919. The production of electrical equipment dates back to the 50s. Over the years the Company has adapted its products in relation to the development of the industrial sector electric and and' specializes in the design and manufacture of machines and equipment for the electronics industry , more precisely in the systems used to assemble and process of electrical circuitry, such printed circuit boards, for components through hole, SMT and Ball grid array.

The current supply of Etneo includes a wide range of machines for manual soldering, machines for desoldering, Rework, all of them made with the most modern production techniques .

The years prior to 2000 were the years of tools, where skill of the operators was crucial, the post 2000 are the years of robotics, where the Robot has become the tool of the Operator, Etneo shares this reality and his Robot Process solutions now represent cutting edge of technology, etneo.com.

Desoldering

Etneo manufactures precision tools for the Electronics and Electrical Industry in general. In particular, its solutions are widely used with functions and specifications widely appreciated. Below, the main production equipment for manual soldering with different levels of power and performance.

Soldering Station 202D from 120W

Double tool soldering station 203D from 180W

High Power Soldering stations Power supply solid state 320W

High Power Soldering stations Power supply solid state 180W

Analogue Soldering Station ECO3100
Entry level 80W

Auto Feed Soldering Unit model 376D

Soldering Unit ECO3112 Thermal tweezer

Etneo design and make Special Custom machines for different applications, such as stations for the restoration of works of art, produced by major industry players.

The production of heaters of every shape has allowed the Company to make Hot Air Stations for different uses, from the multifunction rework to the soldering of special materials, tools to pre-heating point to point for automatic production in the field automotive, while in the presence of high mass in order to improve and accelerate the cycle time. Below are the main equipment.

Advanced Desoldering station model ETX 50 with micronozzles - picture above -

Hot Air Station E System Air

Multifunction Stations - Soldering - Desoldering- Hot Air

Tips / nozzles / and replacement parts for all of our stations are available on our DEDICATED STORE

Pricing Informations included

Desoldering Station 201B - page 4

SPECIAL HOT AIR + IR PREHEATER

Fixture Base for Hot Air unit model E800L for Easy Rework

Selective Hot air for Solder PRE HEAT

Etneo Web Store

In the ETNEO store you can buy in absolute comfort and safety.

The online shop of Etneo Italy offers to all customers products for microelectronics (soldering, smoke extractors, ESD protection, Rework services for boards and components and much more) for industrial automation (BGA robots, soldering and dispensing robots).

Visit our pages, check all the specifications of the products, including demonstration videos, register to be up to date on news and events. If you need help call +39 0321 697.200 office hours - or send an sms to +39 333.2809791.

In this Section the latest equipment used in the manufacturing industry and laboratory.

Powerful turbine fumes extractors, models w Q1 / Q2 with one or two extraction arms photo above

ET 493 ESD desktop fumes extractor

EH19P - Suspended turbine fumes Extractor

EQ2,2 Powerful Filtration system with two multifunction air extractions and filters

ET Q600 Selective pot 600w lead free

ET Lead free soldering pot from 200 to 400W

Manual dispensing economic system Etneo 982B

Antistatic tweezers with tips Wafer Tweezers - Tweezers plastic fiber Tweezers quality SA
