## INFRARED PREHEATER MODEL E854 ESD

### Features:

1. Imported infrared ceramic heater, fast heating, high efficiency with long life.
2. With thermometer inside, it can check the PCB temperature conveniently.
3. Closed loop of sensor, PID control, temperature accurate and stable.
4. Applicable to reflow soldering and preheating for some PCBs and where other heating conditions are needed.
5. ESD safe design.

### Specifications:

Heating Power	600 Watt
Plate Area	130*130mm
Plate Material	Ceramic heater
Temperature Sensor	K-type thermocouple
Temperature Range	50 C°-350 C°
Measurement Range of Thermometer	0-600 C°
Ambient Conditions	0-40 C°
Temperature Stability	±1 C°
Outer Dimensions	250(L)*200(W)*63(H)mm
Weight	About 2.5kg
